TO ARCHITECTS, BUILDERS, &c.

ALL descriptions of TERRA COTTA, CEMENT, and PLASTER CASTINGS, executed in a first-rate manner, on reasonable terms, by J. HERBERT and SON, Modellers, &c. 63, Parker-street, Drury-lane. A splendid assortment of Corinthian, Ionic, and other Capitals; Cornice Flowers, Balusters, Trusses, &c.; Elizabethan and other Chimney Shafts.

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick-setting Cement that requires no colouring.—Sold exclusively by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster; and Seel-street, Liverpool.

KEENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal uses.—These well known hard stone-wax dry quickly, and can be painted upon within a few hours. Made and sold by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster.

PORTLAND CEMENT is the cheapest, because the best Cement for external uses. As a stucco, it requires no colouring, does not vegetate, and is not affected by frost. As a mortar for brick work, it may be mixed with three to four parts of sand; and, for concrete, it will carry ten to twelve times its volume of sand and gravel.—Manufactured by JOHN BAZLEY WHITE and SONS, 12, Millbank-street, Westminster, and Seel-street, Liverpool.

4, South Wharf, Paddington.

PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the trade the above superior CEMENT, being of uniform colour and quality in density never before attained in Portland Cements. It possesses extraordinary compositious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack; combines with which its retinent hydraulic properties stamp it at once as the first cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by R. GRAVER, Esq. at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

PORTLAND CEMENT.—THOMAS FREEN and CO. having completed their works at WOULDHAM-ON-THE-MEDWAY for the manufacture of PORTLAND CEMENT, beg to inform their friends and the public that they are now ready to supply them with cement of superior quality on reasonable terms.—Roman Cement and Plaster of Paris Works, Tuscany Wharf, Canal-road, Kingsland-road.

PORTLAND CEMENT.—JAMES WESTON, having commenced manufacturing the above Cement, begs to inform the trade in general that he can supply them with any quantity they may require, either at his Works, Mill-wall, Poplar; St. Andrew's Wharf, Rosl-street, Blackfriars; or Middle Scotland-yard, Westminster. Manufacturer of Roman, Lias, and Mastic Cements, French and English Plaster, &c.

PORTLAND CEMENT.—The difficulty of procuring this valuable Cement of uniform colour and strength has hitherto prevented its more general use. Contractors and Builders will find that these two important qualities may be depended on with the greatest certainty in that manufactured by CHARLES J. HILTON, at his Roman and Portland Cement and Plaster of Paris Works, Faversham, Kent, at which place, also at his Wharfs in London, 6, Upper Thames-street, City, and Great Scotland-yard, Westminster, orders can now be received to any extent.

PORTLAND CEMENT, in Casks of Four Imperial bushels. QUANTITY NOT WEIGHT, BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

PORTLAND CEMENT WORKS, NORTHFLEET, KENT.—Messrs ROBINS and CO. solicit the attention of their friends and the public to their superior Cement, confident that the great improvement in the manufacture thereof during the present year will recure to them a continuance of that patronage with which they have so long been favoured; orders received at the Works, and at Great Scotland yard, Whitehall.

Great Scotland yard, Whitehall.

NOTICE.—PATENT PORTLAND CEMENT. The Co-PARTNERSHIP lately subsisting between ROBINS, ASPDIN, and ODE, having been DISSOLVED on the 7th day of November last, by a decree of the Honour the Vice-Chancellor Turner, and an injunction granted restraining William Aspdin, then of Otter House, Northfleet, Kent, from intermeddling with, or receiving or disposing of any of the moneys, property, or assets of the said late partnership, and from using or placing the name thereof for any purpose whatsoever, Messrs ROBINS and COX, having been authorized to wind up the affairs of the late Co-partnership, request the Creditors of the late Firm forthwith to render their accounts, that the same may be discharged; and the Debtors to the late firm will be pleased, at their convenience, to pay their accounts, either at the Cement Works, Northfleet, Kent, or at Great Scotland-yard, Whitehall, where Messrs ROBINS and COX continue to carry on their Manufacture and Trade in Portland Cement, in connection with Messrs Goodwin and Sehmidt, under the style or firm of ROBINS and COMPANY.

ROMAN and OTHER CEMENTS, Manufactured by J. M. BLAKEFIELD, successor to the Patentees, PARKER and WYATT; who, in 1791, first introduced PARKER'S ROMAN CEMENT; also Terras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Tiles, &c.

Manufactory, Mill Wall, Poplar; Depôts Commercial-road, Lambeth; and Paddington-basin.

PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT,

As used at St. George's Hospital, Hyde Park Corner.

JOHNS and CO. having effected some important improvements in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as rendering every other substance the common Lime Wash or Water Colour for STUCCO or BRICK WORK, &c. to a most glaring fault, but may be tinted to any other—DORE'S SOFT WASH OFF—is perfectly dry in twenty-four hours, and, being a non-absorbent, is admirably adapted for Railway Stations, Union Workhouses, Barracks, Schools, Prisons, &c. One cwt. will cover 250 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its suitableness for internal as well as external surfaces, places it above all other materials of the kind; it has no caustic qualities; may be painted or papered in a few days; never blisters, cracks, or vegetates; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, from parties eminent, and every information obtained on application to the Sole Agents, PHILIP HAKE and Co. at the Warehouse, 21, Wood-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

POZZOLANA from the Mine of St. Paul, at Rome.—CONTRACTORS, BUILDERS, and OTHERS constructing or repairing Docks, Quays, Wells, Foundations of Houses, or other works where the object is to prevent the Filtering of Water, are strongly recommended to use Pozzolana, which is the only true Cement that guarantees perfect and durable solidity to hydraulic works. Mortar made of lime and Pozzolana is also particularly recommended in building houses. The walls are then impervious to damp. When common mortar is used, the damp of the atmosphere in rainy weather attracts the saline particles in the sand, which evaporating, produce a moisture in the interior of the houses equally injurious to the furniture and to the health of the inhabitants.

Whole cargoes of Pozzolana delivered to any port of the United Kingdom on very moderate terms and large or small quantities in London.

Apply to Messrs A. SNIDER, PELLEGRINI, and CO. 118, Fenchurch-street, London.

WILLIAM ASPDIN'S PATENT PORTLAND CEMENT.—Messrs ASPDIN, ODE, and CO. have much pleasure in informing consumers of this valuable Cement that as their works are now in operation they are prepared to execute any orders they may be favoured with

New Wharf, Abingdon-street, Westminster, Sept. 29, 1852.

PARIAN CEMENT for internal use, to be PAINTED IN A FEW HOURS AND PAPERED WITHIN A COUPLE OF DAYS.—CHARLES FRANCIS and SONS, Patentees, Nine Elms, London.

MEDINA (ROMAN) CEMENT.—The material of which this cement is made is obtained in the Isle of Wight. It has all the properties of the Sheppy Stone, but is much better adapted to engineering works, from the rapidity with which it sets and hardens under water. It has been largely used at the Great Bell Rock Lighthouse at Cherbourg; in a similar work at Alderney; and at Dover New Pier, to unite the masonry. The foundation of the centre pier of the Tubular Bridge at Menai Straits is laid in Medina Cement. A new groyne at Sandown Bay, Isle of Wight, has been constructed of no other material but this cement and ballingers. The work extends 300 feet into the sea, and is exposed to almost violent action of the element, in a position where every former cement would have been rapidly washed away. The unsurpassed qualities of the varied qualities of Roman Cement are superseded by the use of this improved manufacture.

CHAS. FRANCIS and SONS, Nine Elms, London; or West Medina Mill, Newport, Isle of Wight.

Agent for Southampton, R. L. FLUDER, Ameroon Wharf.

GREAVES'S BLUE LIAS LIME.—The superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shell lime for mortar is burnt on an improved principle, leaving entirely any core. The satisfaction constantly expressed by Engineers, Architects, and Contractors of the above, is its best recommendation.
